It simulates real-world scenarios where participants are responsible for managing a company across multiple departments—such as R&D, marketing, production, finance, and HR. The goal is to outperform competitors by making strategic decisions that influence financial performance, market share, customer satisfaction, and overall company health. Key features of Capsim include: - Dynamic market environments that respond to participant decisions - Multiple rounds of decision-making, typically spanning several simulated years - Data-driven feedback to assess performance - Emphasis on teamwork,

- Maintain operational efficiency
- Develop sustainable competitive advantages

Understanding these goals provides context for why certain decisions are prioritized within the simulation.

- Predefined strategies or decisions that guarantee high scores
- Cheat sheets or guides claiming to provide optimal decisions
- Analytical frameworks that help interpret data and make informed choices
- Sample decision sets that can be adapted to different rounds

It's important to recognize that no one-size-fits-all answer exists because the simulation's environment is dynamic and influenced by competitors' actions, market conditions, and internal company decisions.
