this handbook is structured in two parts it provides on the one hand a comprehensive synchronic overview of the phonetics and phonology including prosody of a breadth of romance languages and focuses on the other hand on central topics of research in romance segmental and suprasegmental phonology including comparative and diachronic perspectives phonetics and phonology have always been a core discipline in romance linguistics the wide synchronic variety of languages and dialects derived from spoken latin is extensively explored in numerous corpus and atlas projects and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages this rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into incipient ongoing or concluded processes of phonological change the volume can be read both as a state of the art report of research in the field and as a manual of romance languages with special emphasis on the key topics of phonetics and phonology

when we re ill we trust in doctors to put our well being first but medicine s expanding capability and soaring costs are putting this promise at risk increasingly society is calling upon physicians to limit care and to use their skills on behalf of health plan bureaucrats public officials national security and courts of law and doctors are answering this call they re endangering patients veiling moral choices behind the language of science and at times compromising our liberties in the hippocratic myth dr m gregg bloche marshals his expertise in medicine and the law to expose how doctors are pushed into acting both as caregivers and cost cutters compromising their fidelity to patients politics keeps doctors from giving war veterans the help they need insurers and hospital administrators pressure doctors to discontinue life

saving treatment even when patients and family members object medicine has become a weapon in america s battles over abortion child custody criminal responsibility and the rights of gays and lesbians the war on terror has exploited clinical psychology to inflict harm challenging provocative and insightful the hippocratic myth breaks the code of silence and issues a powerful warning about the need for doctors to forge a new compact with patients and society

studies in diachronic linguistics increasingly acknowledge that linguistic change is highly context dependent and somehow tied to constructions as linguistic units this is the first volume to investigate the role of constructions and the potential of constructional approaches in linguistic change the contributions in this volume comprise both theoretical and empirical studies all of which are accessible for a general audience while some contributions explicitly aim at

comparing and unifying concepts from both traditional grammatical theories and recent construction grammar approaches others offer detailed case studies of exemplary problems from a constructional point of view the papers offer a cross linguistic perspective and deal with a number of different language families ranging from germanic to austronesian
